

# Think Logistics Workshop

**FREE  
1 hour  
virtual  
workshop**

**An insight into  
the fast-paced,  
well-paid world  
of logistics!**

## **The workshop:**

- Provides young people with a better understanding of logistics
- Raises awareness of the different career entry points in logistics
- Encourages young people to consider logistics as a profession of choice
- Explores traditional and non-traditional careers in the sector

## **Gatsby Benchmarks**

**Think Logistics workshops link to Gatsby Benchmarks 2, 4, 5, 6 and 7 and are delivered to secondary schools and colleges across the UK free of charge.**

There has never been a better time for young people to step into logistics and step up the career ladder at pace!

SKILLS SHORTAGE

Current labour market information states that 49.2% of the management workforce in warehousing is set to retire by 2027 (*LMI for All, 2019*).

## Sector Support

We have support from a wide range of companies and membership organisations, all passionate about inspiring the next generation. The companies we work with understand that the logistics sector needs to reinvent the way in which it promotes itself to young people. They have committed to providing apprentices, graduates and other early career employees for workshop delivery. By providing encounters with relevant role models in the sector, direct from their place of work and that have passed through different educational routes, the workshop aims to inspire more students to “**Think Logistics!**”
